

350 Datasets for Exploratory Data Analysis

A Curated Reference for Students & Educators

Covers Socioeconomics · Health · Climate · Finance · Sports · Urban Data · ML · NLP · and more — with direct download links.

How to Use This Document

Each dataset below includes a short description and a direct download link. Students should select a dataset that matches their interest area, download the data, and build an exploratory dashboard using tools such as Python (Pandas, Matplotlib, Seaborn). Entries #101–#350 use **direct file URLs** (CSV / ZIP / JSON / XLSX) that fetch the data immediately — no login, no registration.

How to Download the Files

- **ZIP, XLS/XLSX, TAR.GZ files** — click the link and the file downloads automatically.
- **CSV, JSON, TSV files** — if the file opens in your browser instead of downloading, right-click the link and choose 'Save link as...', or press Ctrl+S after the file opens.
- **Python / Pandas users** — you don't need to download at all. Pass the URL directly: `df = pd.read_csv('paste-url-here')`
